

CSG Kenan[®]/BP C API

Software Product Description

CSG Systems Inc.

Product Release #: 11.7

SPD #: KBPAPI-11.7-SPD-2005-04-29

Date: April 29, 2005

Software Product Description for CSG Kenan/BP C API

The CSG Kenan/BP C Application Programmer Interface (API) lets developers build custom C/C++ applications that integrate with CSG Kenan/BP.

CSG Kenan/BP C API Features

The CSG Kenan/BP C API supports the following activities:

- retrieving and updating account information
- accessing charge and discount information
- viewing and updating adjustments
- approving adjustments and refunds
- adjusting specific charges, billed and unbilled
- accessing and updating payment and deposit information
- accessing writeoff recovery information
- accessing and modifying product and service information
- viewing usage information
- viewing and provisioning product packages
- accessing language and currency information
- accessing and modifying credit card information

Hardware and Software Support

The CSG Kenan/BP C API requires a C compiler for compiling code and a C++ compiler for linking.

The CSG Kenan/BP C API uses the C++/ANSI C programming language standards.

CSG Products Supported

The CSG Kenan/BP C API supports the following CSG products. See the individual Software Product Description documents for these products for information on their capabilities and requirements (including third-party software).

- CSG Kenan/BP 11.7

Required Software

The following third-party software is required to run CSG Kenan/BP C API:

- IBM VisualAge[®] C V.6.0.0.11 (C++ V 6.0.0.12) or higher compiler (only if licensee is running AIX operating system).
- Sun Workshop C++ V.6 compiler, update 2 (only if licensee is running Solaris operating system).
- HP acc 3.45 compiler (only if licensee is running HP-UX operating system).
